This citation will provide the students with a general background in Meteorology, as offered by the lower level courses, and a broader background on a wide range of subfields in Meteorology and on current issues in Climate Research, as provided by the two required courses. This minor is aimed at students who wish to be informed about this field, who do not have an a priori interest to pursue graduate work in this field, but who might pursue careers where background in Meteorology is important, such as environmental policy, government, and industry. This minor is not open to students who major in Physical Sciences with a concentration in Meteorology, or who major in Physics within the Meteorology Physics area of concentration.

The student must choose two electives from:

METO 123 Global Change (3)
METO 200 Weather and Climate (3)
Any other 400 level courses offered below as electives

The following two courses are required:

METO 400 The Atmosphere (3)
METO 401 Global Environment (3)

One additional elective from

- Any 400 level courses offered in the Department of Meteorology approved by the Undergraduate Director.
- Courses offered by the Department of Geology and Geography, such as:
  GEOL 437 Global Climate Change: Past and Present (3)
  GEOL 452 Watershed and Wetland Hydrology (3)
  GEOG 446 Applied Climatology (3)
  GEOG 447 Advanced Biogeography (3)
  GEOG 472 Remote Sensing (3)

A total of 15 credits is required. All courses presented for the minor must be passed with a grade of “C” or better.
