I. RATIONALE

The Graduate Certificate in Professional Studies in Economic Analysis was approved on October 11, 2011 (PCC Log No. 11007). In developing the program, the Department of Economics used the 500-level rubric so make the distinction between the professional program and the traditional research-based degree. Graduate School policy, however, states that 500-level courses are ineligible for graduate credit. The Office of the Registrar's grade and credit calculator is programmed to ignore 500-level courses. The modification proposal offers the renumbering of courses using the 600-level rubric so that an enrolled student's record demonstrates evidence of degree progress, completion, and the awarding of the degree.

The grid below represents the courses approved by Graduate PCC and the corresponding VPAC approved course numbers.
