The USM in 2010: Responding to the Challenges that Lie Ahead” presents what the University System of Maryland can and ought to be in the year 2010, identifies challenges the USM faces in realizing the plan, and articulates specific, measurable strategies USM institutions must undertake in order to succeed.

Data Journal

The USM Data Journal provides statistics on students, degrees, personnel, financial and other miscellaneous information for the University System of Maryland and our 13 member institutions.

Annual USM Reports

The USM Office produces reports annually on issues of interest to the general public and for its member institutions. A sample of topics include: dashboard indicators, faculty workload, enrollment and financial aid.

National Data

Contains data for approximately 525 public four-year colleges and universities in the U.S. Although the data are presented for primarily public institutions, some data -
notably faculty awards and memberships - also cover private universities and colleges.

**2002 Economic Impact Study**

The study examines the USM's fiscal impact on the state's economy, its contribution to workforce development, and its influence on economic development.
